Election/Restriction

It is noted that applicant elected various species in a telephone conversation with the previous examiner on 26 October 2004, thereby providing a complete response to the election/restriction requirement mailed 6/25/04. In view of the complete response, the previous Notice of Nonresponsive Amendment is hereby withdrawn. The current examiner apologizes for the extreme delay in prosecution, and for any inconvenience to applicants due to the delay.

To facilitate prosecution and to make the election requirement consistent with election requirements/examination in related cases, the previous restriction and election requirements are hereby withdrawn and a new election is required, as set forth below.

This application contains claims directed to the following patentably distinct species.

A) a single functional element; e.g. from among those recited in claims 12, 18, 29, 35, 85, 107-110, 117, 131, 141, 148, 153, 162, and 174. Applicant is advised that a specific element must be elected; i.e. election of a "peptide region" would require a further indication of WHICH peptide region from among those in claims 107-110 is the SPECIFIC one elected. Where an elected functional element may comprise a specific sequence, then applicant must specify, by SEQ ID NO:, the particular element elected. Applicant is further advised that where an elected functional element may be "inserted" at a plurality of positions, a specific position for the elected element must also be designated.

B) a single joining element; e.g. from among those recited in claims 13, 14, 19, 28, 30, 31, 35-37, 47, 49-69, 74-76, 84, 86-106, 111-113, 123, 125-130, 132, 140, 142-147, 149, 159, 161, 163-165, 173, and 175-178. Where an elected joining element may comprise a specific sequence, then applicant must specify, by SEQ ID NO:, the particular element elected.

C) a single structural element; e.g. from those recited in claims 15-17 and 32-34. Where an elected structural element may comprise a specific sequence, then applicant must specify, by SEQ ID NO:, the particular element elected.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-11, 20-27, 38-46, 77-83, 114-122, 133-139, 150-158, and 166-172 are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marjorie Moran whose telephone number is 571-272-0720. The examiner can normally be reached on M-F 6:30 am- 2 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached on 571-272-0735. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
